By DREW PEARSON and ROBERT S. ALLEN

ZICK IS NAMED FOR VACANCY ON CIRCUIT BENCH

Ogle Co. Judge is G. O. P. Candidate; Special Election Dec. 7

Washington — The "Eight Old Men" of the Supreme Court are going out of their way to show the utmost personal cordiality toward the "New Young Man".

On the seventeenth ballot of a three-hour convention held in Freeport Thursday afternoon County Judge Leon A. Zick of Ogle county was named as the Republican candidate for the vacant judgeship of the 15th judicial district, comprising the counties of Lee, Ogle, Stephenson, Carroll and Jo Daviess. Judge Zick's opponent at the special election to be held Dec. 7 will be named by the Democratic committee in convention at Oregon this afternoon.

Not only are they leaning over backward to make him feel welcome, but their wives are extending themselves to be gracious to Mrs. Black. They have exchanged neighborly calls, and in other ways have conveyed their goodwill and friendship.

The Ogle county candidate for the G. O. P. nomination won out in a heated vote contest with Harry L. Heer of Galena, a former circuit judge, and Charles E. Stewart of Mount Carroll. Ogle and Jo Daviess counties voted 100 per cent for their respective candidates, Zick and Heer, on each of the 17 ballots.

While all the veterans of the bench have taken special pains to be nice to Black, the Catholic Justice Butler, the Jewish Brandeis and Cardozo, and McReynolds, hard-bitten anti-New Dealer, have been particularly courteous.

At their first meeting in the robing room, Butler made a friendly suggestion to Black about the fit of his judicial gown. Cardozo gave Black a fatherly pat on the back; Brandeis shook his hand warmly and inquired about Mrs. Black and their youngest son, who was ill last spring. Justice McReynolds was equally affable.

When Justice Cardozo took his seat on the Court, McReynolds noisily read a newspaper. For several years thereafter he addressed Cardozo only in the transaction of official business. But this time the Tennessee was the acme of courtesy. He told Black he was happy to have a fellow-Southerner as a colleague, spoke of mutual friends.

**Wins On 17th Ballot**  
The nomination went to Zick on the seventeenth ballot, after Carroll county, which had seen solid for Stewart, its own entry, on all previous roll calls, decided to split its nine and 23-500th votes among the three aspirants.

**Hughes' Work**  
Court insiders give Chief Justice Hughes principal credit for the warmth of Black's reception. They say Hughes personally contacted each of the Justices and discreetly suggested that no hint of personal or partisan hostility be displayed toward Black.

In the final tabulation, Zick had 40 and 295-500th votes; Heer, 28 and 97-500th; and Stewart, 8 and 378-500th.

Friends of the Chief Justice say he resents deeply the fusillades against his new colleague, for the same reason he opposed the President's court bill. Hughes considers their attacks on the dignity and integrity of the Supreme Court. To express his disapproval he is being especially cordial to Black.

**Eldena Boy First Victim of Local Hunting Season**

Had Hughes the appointing power it is a safe conjecture that the Alabama still would be in the Senate. But since Black has been appointed, confirmed, and has taken the oath of office, Hughes holds that mud-slinging at him cannot help but reflect against the standing of the court.

Robert Welty, 15-year-old son of Mr. and Mrs. Day Welty of Eldena, was the first hunting accident victim of the 1937-38 season in Lee county yesterday afternoon about 3 o'clock while hunting pigeons on the Ed Calhoun farm in South Dixon with a 10 gauge shotgun.

**Gaston B. Means**  
Gaston B. Means, mystery man of the Harding scandals and now serving time for embezzling Mrs. Evelyn Walsh McLean out of \$100,000 in connection with the Lindbergh kidnapping, is not expected to live much longer.

In climbing a fence he placed his left hand over the muzzle of the weapon which discharged, badly tearing the flesh of the palm of his hand. He returned to his home in Eldena at once and was taken to the Katherine Shaw Betha hospital in this city, where the injury was dressed. The attending physician hopes to be able to save the hand and it is thought that the young man will not have to suffer the amputation of any of the fingers, it was stated today. He spent a restful night and will remain at the hospital for several days.

**Sistie and Buzzy**  
Motoring through the rural sections of Washington state during the President's recent visit to the Northwest, his long motor caravan of about 30 cars sometimes came to an abrupt and mysterious halt in the middle of nowhere.

**Peoria Girl In Coma Four Days Believed Encephalitis Victim**

Not—Means got his start falling out of upper berth, then suing the railroad company for damages. He was so successful at it that the insurance companies eventually hired him to detect this racket on the part of others.

Peoria, Ill. — (AP) — Slight improvement has been noted in the condition of June Johnson, 15-year-old orphan, ill four days with an ailment which physicians said may be lethargic encephalitis or sleeping sickness.

Newspapermen, riding toward the rear of the caravan, craned their necks to see what had happened, whether Roosevelt's car had a flat tire, whether someone had made an attempt on his life.

The girl fell into a coma after she collapsed in school. Mrs. Viola Colwell, an aunt, with whom Miss Johnson has been living, said the girl appeared listless about six weeks ago and lost her appetite. Later she complained of drowsiness and headaches.

**British Re-Armament**  
All the dispatches received from American officials abroad indicate that Great Britain now is making very real progress in her re-armament program, and that this is causing some concern to her potential enemies.

**Save Their Necks**  
Chicago, Oct. 15.—(AP)—Patrons at Orchestra Hall recitals no longer will have to crane their necks to see a piano artist's hands in action.

Various friendly countries, including Sweden and Czechoslovakia, are manufacturing parts for British airplanes and shells. Even Swiss watchmakers are working on British technical equipment.

A mirror designed to make the pianist's hands visible from every quarter of the hall will be used this season.

However, the British are still about a year and a half behind the completion of their program, and this is one reason they have been following the policy of "wait rather than risk a fight" in the Mediterranean.

**Mrs. Roosevelt's Birthday**  
Late in the day of October 11th — Mrs. Roosevelt's birthday — a scene was enacted in front of the

ATTITUDE AND DESIRES TOLD BY EDUCATORS

Platform as Submitted by Committee Voted During Morning

The attitudes of desires of the Rock River Division of the Illinois Education Assn. on matters of importance to teaching and schools in general, and in the Rock River division in particular, were set forth in the report of the resolutions committee—Miss Esther M. Barton, Ira R. Hendrickson and C. R. Miller—as follows, which was unanimously adopted at this morning's session of the institute in session at the Dixon high school auditorium:

To the various organizations whose courtesies have contributed to the success of this meeting, we extend our thanks. Specifically, to the Dixon Chamber of Commerce for material contributions; to the Dixon Board of Education for the use of this splendid auditorium; and to the officers of the Rock River Division for their efforts and time so freely given in arranging the program.

We still face a condition of gross inequality of educational opportunity in Illinois, and while the officers of our state association have labored long and diligently for remedial legislation, their efforts have not met with success. We commend them for their unremitting zeal, and urge them to continue with a vigorous campaign, in the hope that success will eventually come.

**Endorse Pension Bill**  
We endorse the main provisions of the pension bill introduced in the last session of the Legislature, and regret that it failed of passage. We urge our officers to continue in their efforts to give us a safe and sane pension law.

We believe that the Illinois Education Association and the National Education Association are most effective agencies for the solution of the problems of education, and that their efforts contribute greatly to the betterment of school conditions, both for teachers and pupils. We pledge them our support, and request that our administrative officers conduct a vigorous campaign for increased enrollment of our teachers in these organizations.

We approve an appropriation of one hundred fifty dollars from the treasury of the Division to the Committee of Seven of the Northern Illinois Conference on Superintendence, for their use in advancing the study of grade placement in arithmetic.

We reaffirm our belief that higher standards of teacher certification will result in increased teaching efficiency and will improve the professional status of the individual teacher. We recommend, therefore, that efforts be continued to raise the standards of teacher certification.

We commend our State Director of Public Relations, Bernard I. Griffith, for the splendid work he has done in bringing to public attention the problems facing education in Illinois, and urge him to continue the good work.

**Urge Publicity**  
We endorse the activities of the Illinois State Board Association and we urge the school boards in the Rock River Division to affiliate themselves with their state organization. We urge our officers to continue the program of publicity concerning this organization to the end that our Rock River schools

ILL. EDUCATION GROUP GATHERS HERE FOR MEET

Over 1200 Teachers Are Guests of City Today

Dixon was host today to more than 1,200 teachers who gathered in the high school auditorium for the ninth annual meeting of the Rock River division of the Illinois Education Association.

The principal address of the morning session was given by Fred L. Biester, superintendent of schools of Glen Ellyn, Ill., and president of the Illinois Education Association. He chose for his subject "Your Organization and Adequate Legislation for Education" in which he indicated the facts which have kept the association from succeeding with its plans for a better organized and financed school system in the state.

The legislature and administration, he said, have slowed the progress and he denied the charges that the organization gave "only lip service" to support the bill for a state school board.

**Must Submit Data**  
"The state legislature has gone backwards," he said, "as far as appropriations for help for schools is concerned." As a result, the duty now appears that the legislature and governor must be flooded with the facts and convinced that the position is just. The organization must fight and no longer apologize for being on the firing line, he stated.

**Must Professionalize**  
"Our profession must be professionalized," he declared, "and the leadership must be taken to raise requirements for which people get in the school business." Higher standards, he continued, must be set and this means an increase in salaries. "The obligation to democracy," he concluded, "is too great for untrained hands."

A business meeting, presided over by President H. R. Lissack, included reports of the nomination and resolutions committees. The resolutions adopted at this morning's session appear elsewhere in this issue.

**Should the work of the Schools of Illinois be Unified and Correlated Through the Use of a State Curriculum?** was the subject chosen for the panel discussion. The personnel of the panel included R. A. Lease, superintendent of schools, Sycamore, Ill., chairman; B. J. Frazier, principal of Dixon high school; Dr. Helen Messenger, department of education N. I. S. T. C.; Harold Patterson, superintendent of schools of Mt. Morris; Charles C. Stadman, assistant state superintendent from Springfield; R. W. Terrel, Sycamore high school; and Edith Wentworth, DeKalb high school.

**Round Table Debates**  
Various debates of benefits and handicaps of such a curriculum were conducted in a round table session. It was indicated that such a plan would improve standards of teaching, that there would be a better evaluation of subject matter on the basis of pupil growth.

Opening the morning session the Heidelberg Male quartet, an organization of national reputation, sang selections from light operas with Mrs. Bennett at the piano.

**County Institute**  
"If I had but eight years left to teach, what subjects would I select?"  
Dr. Willis A. Sutton, superintendent of schools of Atlanta, Ga., selected this as the premise for his address, "The Way Out," a sequel to his morning talk, which opened the concluding session of the annual Lee County Teachers' Institute yesterday afternoon at the high school.

"Education," Dr. Sutton declared, "has made people forget the land. It becomes, therefore, the paramount business of education today to teach a love of the soil."

Greek Slayer Put to Death in Chair Soon After Midnight Hour

No Friends Called to See Chrisoulas Last Day

Chicago, Oct. 15.—(AP)—Peter Chrisoulas, 40, paid with his life early today for the slaying of Irving Fehlberg, a theatre manager, in a west side movie house on March, 14, 1936.

He died in the electric chair at the Cook county jail shortly after midnight ending a determined fight of more than a year by lawyers and friends to save his life.

Chrisoulas, who was convicted of shooting Fehlberg to death after he, Chrisoulas, had been seized for molesting a 12-year-old girl patron, was strapped in the chair at 12:04; the current was turned off three minutes and 15 seconds later. He was pronounced dead at 12:10 by jail physicians.

In a brief interview with Warden Frank Sain shortly before he was executed, Chrisoulas expressed worry over a new suit of clothes he bought before his arrest, saying he wanted to be buried in it.

**Ended Long Legal Fight**  
Chrisoulas's long legal fight included a criminal court trial, a sanity trial, two appeals to the Illinois Supreme Court, and two to Gov. Horner.

The condemned man seemed bewildered when Warden Sain told him the governor had turned down his plea for executive clemency.

Chrisoulas, a nervous little man, showed no interest in his food the rest of the day and answered questions tentatively.

**Former Dixon Man Will Face Forgery Charges on Monday**  
Eugene Judd of Kankakee, formerly of Dixon, was arrested late yesterday afternoon by Chief Van Bibber on a charge of forgery preferred by Otto Ventler, local tavern proprietor. Taken before Justice J. O. Shaulis, Judd was held under bond of \$1,000 which he was unable to furnish and he was taken to the county jail, the hearing being continued until Monday morning at 10 o'clock.

The hearing of Raymond Spotts, charged in a warrant filed by Mrs. Eugenia Parks with carrying concealed weapons, was continued for ten days this morning in Justice Shaulis' court. Spotts is at liberty under bond.

Robert Jackson of this city, arrested in Mendota last week on a charge of defrauding an inn keeper, furnished bond yesterday afternoon and was released from custody at the county jail. His hearing has been continued until Oct. 23.

**Painters Told of Advertising Value**  
A group of painting contractors and dealers attended an informal meeting at the Hotel Nachusa last evening as guests of a lead company. A demonstration of the various uses of the company's products was given by Roy Bess, who also spoke of the modern trend of interior wall finishes and the styling of paint to meet the present day demands for colorful interiors. He painted several panels to illustrate his talk. Howard Ellis of Chicago spoke upon the subject of advantages of advertising to the painting trade. He stressed the necessity of using newspaper and various forms of advertising as a means of stimulating and improving business. The meeting concluded with a buffet luncheon.

**END OF THE TRAIL**  
Bangor, Me., Oct. 15.—(AP)—Al Brady, Indiana-born gang leader, slain with a hatchman here in a Columbus Day gun battle with Federal agents, was buried today, unclaimed. No ceremony attended the lowering of the cheap wooden box into a grave in an isolated section of the Mount Hope cemetery, city property containing other unclaimed dead.

Henry Raffenberg of this city was the first violator of city traffic ordinances arrested this week, and when arraigned before Justice J. O. Shaulis was assessed a fine of \$5 and costs on a speeding charge, which was paid.

**UNCONTRACTED PAINT**  
Police were called to the Stewart neighborhood grocery store at 703 North Galena avenue late last evening, where it was reported that vandals had splashed several colors of paint against the front of the building. The investigation was still under way today.

**TRUCK STRUCK SIGN**  
A truck driven by Harry A. Rassow of Milwaukee, Wis., caused considerable damage to the large neon illuminated sign in front of the Bowman shoe store about 7:30 last evening. The truck, west bound on First street, struck the big sign, tearing it loose from its moorings in the front of the building and badly damaging the neon tubing.

**OIL STATION ROBBED**  
The Butler & Scanlon service station, a half mile west of Dixon on the Lincoln highway, was entered the second time in two weeks last night. A window was broken and the cash opened to admit the intruder, who failed to take any of the stock. The robbery was discovered this morning by James Scanlon when he opened the station. He notified Sheriff Miller who conducted an investigation and who is reported to have obtained several finger prints from objects handled.

**TO HELP EMPLOYEES**  
Employees of the various departments of the Illinois Northern Utilities Company are to be given an opportunity to gain additional education in the departments in which they are employed, it was announced at the local offices today. The company has petitioned the Illinois Commerce Commission for permission to pay 75 per cent of the cost of an educational program for its employees. The program provides a plan whereby employees may obtain an education in their respective departments which would be useful in future years' service to the company.

Auto Struck Horse on Lowell Pk. Road

Cletus Miller, 24, of Mt. Morris, sustained painful scalp injuries and bruises about the body in an automobile accident this morning on the Lowell park road about two and one-half miles north of Dixon as he was returning home from a visit in Dixon, when his car struck a horse belonging to Thomas Prindaville, which was walking across the road.

Miller's car was turned completely over, the windshield was shattered and the body of the car badly damaged. The horse sustained deep cuts but was not seriously injured. Miller was taken to the Katherine Shaw Betha hospital by State Officer Edward Mahan of this city, who was summoned to the scene and after his injuries had been dressed, was taken to his home at Mt. Morris. The damaged car was hauled to a local garage and a Dixon veterinarian treated the injured horse.

University of Illinois Students Warned to Stay Away From Strike

Champaign, Ill., Oct. 15.—(AP)—Police Commissioner John Ross warned University of Illinois students today to stay out of the picket lines in the four-day-old Champaign laundry strike.

"Keep out of the strike," he said, "you won't do yourselves, the community or the university any good."

His statement followed reports that members of a campus organization were taking part in the strike.

Harry Bullock, a truck driver, was injured slightly last night when he was pummeled by pickets as he entered a laundry with a bundle of work from Chanut Field hospital. Strike leaders claimed the laundry, which has been doing

STATE'S CASE IS OPENED AGAINST MRS. HAHN TODAY

Cincinnati, Oct. 15.—(AP)—The state opened its case today against Anna Marie Hahn, on trial on a first degree murder charge, with an assertion by Prosecutor Dudley Miller Outcalt that Jacob Wagner, 78, her alleged victim, "died of the administration of poison commonly used for rats."

Mrs. Hahn, comely 31-year-old blonde, sat impassive as Outcalt told the jury in his opening statement that she "worked her way into his (Wagner's) confidence and 'had the audacity to call herself a niece,' designing thereby 'to enrich herself by exacting money' from the aged man."

**11 Women on Jury**  
Judge Charles S. Bell ordered the jury of 11 women and one man cleared from the room as Defense Counsel Joseph H. Hoodin entered an objection to Outcalt's declaration that "she became friendly with other old men."

Hoodin earlier withdrew a request that the jury be taken to visit Wagner's home.

During arguments which ensued after withdrawal of the jury, Outcalt shouted:

"This woman killed so many men there isn't another human being like her on the face of the earth!"

He added that he intended to show that "within 60 days, three men died" of poison similar to that found in Wagner's viscera, and "that her scheme had been existing in her mind over a period of years."

Declares Relief Must be Removed From All Politics

Chicago, Oct. 15.—(AP)—Three principles to be followed by local communities in financing adequate relief of the indigent "without dire results" were laid before the American Municipal association today by Fred K. Hoehler, American Public Welfare association director.

"The first and foremost," Hoehler said, "is that relief must be completely and absolutely removed from political influence."

"The second principle involves the matter of financing relief directly from city funds. So far as possible, relief expenses should be met from current revenues rather than further increasing the debt of the city through bond issues or other such procedures."

"The third principle is that, in spite of our pride as citizens of local communities and a desire for local control, we must, by force of the present situation, recognize the inability of local governments to carry the burden which has been thrown into their laps."

**Had No Experience**  
Bethany Mo., Oct. 15.—(AP)—Vocational agriculture teachers, choosing entrants for a corn-shucking contest, found few farm boys knew how. The lads had "grown up" since the last crop was raised in 1932.

Drought and grasshoppers destroyed the corn four successive years.

HOLY LAND MADE TROUBLE SPOT BY NEW TERRORISM

Palestine Added To Tired World's Spots Of Conflict

BY THE ASSOCIATED PRESS  
Terrorism in the Holy Land, reaching an acute stage with the ambush slaying of two British constables, centered diplomatic attention today on another of the world's trouble spots.

Even as the British government was concentrating its efforts on preventing the Spanish civil war from spreading into a European conflagration, this latest manifestation of Arab unrest came from its mandated Palestine territory, long the scene of Arab-Jewish conflict.

Constables Norman Harrison and Austin Malia were added to the list of dead, which already included four Arabs in the present disorder. A dozen Jews have been wounded during the last two days. In previous months the casualties mounted into the dozens.

In London, the foreign office was making final preparations for the meeting tomorrow of the nine-nation sub-committee of the 27-power non-intervention committee. This sub-committee will try again to work out a plan for withdrawal of foreigners fighting in the Spanish war.

**More Concessions to Italy**  
The British and French, closely allied in striving to induce Premier Mussolini to call home Italian volunteers serving with the Spanish Loyalist army, and in protecting their Mediterranean interests, were represented as determined to make no more concessions to Italy.

"They were said to be anxious for a showdown on the volunteer question and resolved to stand for no more of Mussolini's 'delaying tactics.'"

Reports from the Orient, where Japanese and Chinese troops are fighting fiercely in Shanghai and engaged along a wide front in north China, gave no hope of any immediate settlement of this grave conflict.

United States Ambassador Nelson Johnson forwarded from Nanking to the state department in Washington a copy of the protest of the American community to Szechwan province against Japanese action in China. The protest urged the United States to use every peaceful means to withdraw moral and material support from Japan.

"The correspondent of the newspaper Nichi Nichi at Tsitsihar, in northern Manchoukou, reported heavy movements of mechanized Soviet troops through Ulan Bator, capital of Outer Mongolia. This correspondent claimed Russia had ordered a general mobilization of its forces in Outer Mongolia."

**Chinese Make Strong Attack**  
In Shanghai, the Chinese army was making a strong attack to stave off a long-expected Japanese general offensive along the 25-mile battle front northwest of the city. Numerous civilian casualties occurred in the international settlement, constantly harassed by fire of the opposing forces. Scores were killed and wounded.

Chinese troops raided Japanese lines in the Chapei section and, afterward, declared they felt confident of being able to hold their own against the Japanese there.

Artillery and aerial bombardments were particularly heavy. International settlement inhabitants were sprayed with shell fragments, stray bullets and shrapnel, as well as being endangered by air bombs.

In Spain, reports from Asturias province indicated the fall of Gijon, last government-held seaport in northwest Spain, was imminent. Insurgent troops were pushing steadily toward this city, supported by terrific aerial bombardment of government lines.

General Francisco Franco was preparing for a big offensive against Catalonia in northeast Spain, evidently planning to try to smash the government resistance in northern Spain as quickly as possible.

**PRESIDENT'S PRESS CONFERENCE**  
Hyde Park, N. Y., Oct. 15.—President Roosevelt said in substance today that an attempt at mediation of the Sino-Japanese conflict would be the first step considered by the conference at Brussels of the nine-power treaty signatories, including the United States.

Asked at a press conference if mediation was a fair assumption to be drawn from his "fireline" radio speech last Tuesday night, the president remarked he had said that in so many words.

While refusing comment on the stock market decline, he indicated he might have something to say on the subject in a general way in his messages to the special and regular sessions of Congress.

Asked if the market developments were bothering him, he told

# PRODUCTION OF NEWSPRINT IN CANADA RISES

Already Leads the World With Great Britain Nearest Rival

Canada has stepped up newsprint production. Advance reports show a 20 per cent increase over 1936. Canada already leads the world in this field. Her nearest competitor, Great Britain, produces less than a third as much, and imports wood pulp to do that.

"Newsprint, always behind the news, is rarely in it," says a bulletin from the Washington, D. C., headquarters of the National Geographic society. "The name is contradictory, for newsprint is innocent of either news or print; it is the mammoth ribbon of blank, uncut paper which is threaded into thundering presses. When it emerges, it has become newspaper."

No Longer Made in China  
The paper behind the print is a modern version of the silver of clean wood or bark on which the savage scratched his runic message. It fits the printing press and the overcoat pocket better than a sliver of wood, but the principal ingredient is still the same.

"Canada's greatest asset for world newsprint leadership is a million and a quarter square miles of spruce and balsam forest. In China, where paper making was developed, newsprint is not made; not the secret, but the forest, has been lost. A mill was erected last year in Canton, but no production has yet been reported."

"The distribution of forest lands freckling the face of the globe gives several countries a chance to make newsprint though they rarely make much news. Estonia, for instance, last year exported more newsprint than did the U. S. S. R. Canada of course leads the world in exporting paper to feed into the maw of the international press, shipping eight times as much as her nearest rival, Finland."

Finland Supplies Newsprint  
"In 1936 Finland was the source of newsprint for 14 countries, chiefly in Europe and South America. Newfoundland came next, shipping her pathless forests in paper form to Great Britain and the United States. Norway and Sweden, with lumbering as a major occupation, and Germany, with a tradition of careful forestry, are also among the leading exporters."

The United States, home of headline-hunters in greatest numbers, is the world's greatest consumer of newsprint. Almost half the world's output in 1936 rolled through United States presses to distribute accounts of highway accidents, battles, explosions, afternoon teas, and local elections. For the past 10 years this country has declined steadily in newsprint manufacture, importing now about three-fourths of its needs. Last year two-thirds came from Canada. Back in 1914, 85 per cent of the newsprint used in the United States was rooted, raised, felled, and processed under the Stars and Stripes.

Most of this country's home-grown newsprint sprouted and spread its leaves in the neighborhood of the Canadian border, particularly in New England and the Pacific Northwest. It figures largely, however, in the industries of most paper-producing states, of which New York and Michigan are first and second. Maine, Ohio, Wisconsin, Pennsylvania, and New Jersey come next, with Washington, Illinois, and Massachusetts following with just about a half-million short tons of paper each annually. Louisiana is foremost among Gulf states which convert their fast-growing southern pine into paper, and experiments are now being made on using the pine pulp for newsprint.

In the widespread paper industry of the United States, newsprint ranks third, being surpassed by wrapping and book papers.

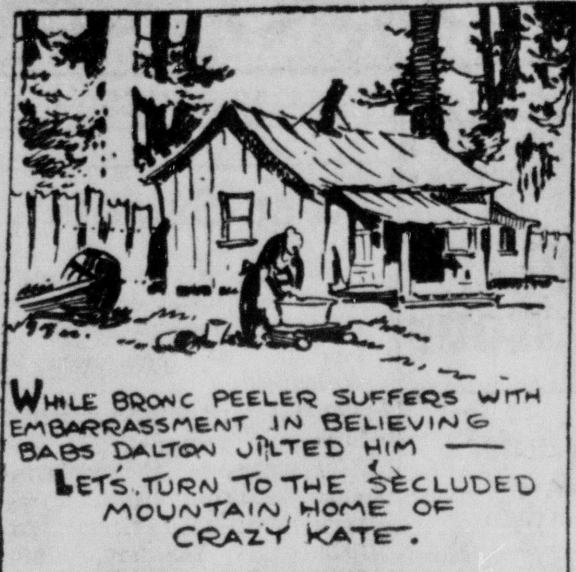

The vast American production of newsprint has developed within the past 60 years, since wood pulp was pressed into service for printing paper as well as for wrapping paper about 1867. Previously straw, principally rye, made the pulp for newspapers, and on its brittle, shiny surface blossomed Civil war calls to arms and black-bordered stories of Lincoln's assassination. Earlier news sheets, small and expensive, had been printed on the durable linen rag paper."

## MAYBE THAT'S WHEN MUD HENS WERE BORN

Zanesville, O. —(AP)—Folks stayed close in their own balliwink in this section along in the 1850's, to judge from a copy of an old Zanesville paper discovered here by Mrs. Samuel M. Wind. The paper, dated March 26, 1856, relates that spring weather had produced mud up to five feet deep in the principal streets. The editor recommended plank sidewalks. Another item concerned a proposal for carrying mail to Marietta, O., a distance of 64 miles, in the "short" time of two days. News from far places consisted of squibs on Jenny Lind singing in New York and troop movements in the Crimean war.

Sunday in London virtually starts at 1 P. M. Saturday. Most of the stores and offices close then and the city takes on a funeral air.

## CHEESE FACTORY NEEDS ADEQUATE VOLUME OF MILK

Expert Lists Four Factors Essential to Plant Operation

With increased interest in Illinois in the manufacture of cheese, S. L. Tuckey, associate in dairy manufacture, college of agriculture, University of Illinois, lists four factors for cooperative groups or individuals to consider in establishing a cheese factory.

Latest production figures show that Illinois has climbed to fourth place among all states with an annual production of about 17,000,000 pounds of cheddar cheese a year. This is just 3,000,000 pounds less than New York produces to hold third place and 4,000,000 pounds less than Indiana in second place. Wisconsin is far in the lead.

"In establishing a cheese factory in a new location consideration should be given, to the volume of milk that can be expected from the community," Tuckey said. "For a one-man factory, an adequate supply of milk would be about 5000 pounds or the output of 200 to 250 cows."

"The factory should be established where the competing price for milk is such that a profit can be made," Tuckey listed as his second factor. "Cheese factories should not be expected to compete with market milk plants, ice cream plants and condensaries on price, for the reason that milk which goes into cheese does not return as much as milk that goes into market milk, ice cream and condensed milk."

As a third factor, he pointed out that advantage should be taken of natural temperature conditions. Water and air are cooler in northern Illinois than in the southern part of the state. This fact makes it easier to produce high quality milk and to keep capital investment and production costs at a minimum. Finally, Tuckey emphasized the importance of obtaining a market outlet that will take all the cheese produced at a price allowing for a profit.

## HAEGAR POTTERY VISITED BY HOME BUREAU MEMBERS

Thirty persons, members of the Home Bureau, their husbands and Miss Elizabeth Colean, Lee County Home Adviser, formed a cavalcade of automobiles for a trip to Haegar Pottery at Dundee Tuesday. After lunch some groups visited a museum and others toured an interesting shop at Geneva. The Little Traveler, which exhibits fine importations from all over the world.

Those on the trip included: Mrs. J. A. Tait, H. P. Klein, Mrs. Anna Klein, Zetta Boehle, Doris Boehle, Mrs. Nellie Keay and Mrs. Elsie Smith of Amboy; Mrs. Zoe Henderson, Mrs. Robert Clark, Kathryn Hill, Mrs. Grace Stanley, Emma Clark, Theresa Hahn, Catherine Hahn, Mrs. Alice Hoban, Mrs. Marie McCoy, Mrs. Cenie Straw, Mrs. Grace McGinnis, Mrs. Elsie Reed, Mrs. Anna Russell and Mrs. Josephine Law of Dixon; Miss May Clarke and Miss Lina Clarke of West Brooklyn; Mrs. Glenn Pfoutz of Ashton; Mrs. Kathryn Johnson of Nachusa; Mr. and Mrs. William Otto and Mr. and Mrs. J. E. Popino of Harmon.

## Where to Go This Coming Week-End By DEDE WELCH, Secretary Dixon Branch Chicago Motor Club

A hunting we must go—Old Jack Frost has been busy in the marshes. Low temperatures in the big lake and wood country north of Illinois, have sent the blue-winged teal on their way southward. The jacksnipe have been on the move. Add up all these signs of autumn and the sportsman motorist knows that it's time to shine up the shotguns and look over the hunting boots and other equipment in order to be ready for the waterfowl and pheasant seasons.

During the month of October the fellow who likes hunting has a choice of a number of different trips on which he can zip over the highways with his hunting outfit. Here is sort of a preview of what is ahead—the possibilities for motoring and hunting during the next 30 days or so.

Wisconsin—Yes, you can load up the old family bus and go to Wisconsin for a little hunting, if you don't mind the non-resident license fee. The Wisconsin duck and snipe season opened October 9 at 7:00 o'clock in the morning. It will continue for 30 days. Then, too, Wisconsin has pheasant hunting on preserves—another sport for October. But don't say we didn't warn you; it's going to be rather expensive hunting pheasants at several simoleons per bird. If it's Wisconsin duck and snipe hunting you want you don't have to drive very far to get it during October. There is the great marsh and lake country near Oshkosh, Winneconne, Poygan, the Fox river marshes—they are magic names in the duck hunting world. You'll find there is great waterfowl shooting country just a few miles from Oshkosh. The Chicago Motor Club will be glad to give you the exact mileage and also routes to any area.

Considered from many angles the expanse of water, shallow sloughs, reedy marshes, and other features which combine to make up the duck country around Winneconne and other small towns up there is one of the most unusual and inviting in the middle west for the waterfowl hunter. The Wolf river comes down from the north. This historic old Fox river (the stream up which Marquette and Joliet traveled in the late 17th century) swings in from the west. By the time the Wolf joins with

the Fox it already has spread out over the country to make miles of shallow lakes and marshes which ducks find perfect for food and refuge. When the two rivers are teamed up they form more shooting area. And when they finally empty their waters into Lake Winnebago they again are "in the duck business" because Winnebago has some dandy points for duck hunting. There is just about every kind of duck hunting known today in that wonderful lake and marsh country.

White House which Mrs. Roosevelt has not heard about.

A woman dressed in a worn tweed coat walked up the driveway from Pennsylvania Avenue, bearing a package wrapped in white tissue paper. With a hesitating step she approached the guard standing by the little white kiosk.

The guard had seen other gifts brought to the door that way, but most of them were brought by chauffeurs or special messengers. "May I leave this for Mrs. Roosevelt?" she said.

The guard declined to take it. Instead, "Go right up to the door," he said.

With increasing timidity the woman advanced further past another guard, climbed the steps, and went to the double doors of the White House. Mumbling a few words to the Negro butler, she left her gift with him, and turned away into the darkness.

## Merry-Go-Round

Governor William Langer of North Dakota has the unusual habit of chewing an unlighted cigar wrapped in cellophane. . . . In stumping Montana to patch up his political fences, Senator Burt Wheeler has carefully avoided Butte, hard-bolled miner capital of the State. He was warned that if he spoke there the strong pro-New Deal miners would heckle him, so Wheeler has taken no personal chances. Instead he sent his secretary, Bailey Stortz, to make a speech over the radio station owned in Butte by the Anaconda Copper Company, attacking Senator Murray and Representative Jerry O'Connell for supporting the President's court bill. . . . Introducing Secretary Harold Ickes at the Out-erlink Bridge dedication ceremonies in Chicago, Mayor Ed Kelly presented him as "Secretary of the Treasury". To which Ickes smilingly replied, "I am sure there are times when Secretary Morgenthau wishes I was Secretary of the Treasury."

## GAME OFFICIAL SUGGESTS

DEER HUNTERS GO RED  
Denver —(AP)—To make deer hunters poor targets, R. G. Parvin, state game commissioner, suggests they wear red capes and hats.

"Last year we had only three fatalities among 16,000 deer hunters but this year we would like to get by without accidents," says Parvin. "And if hunters must drink strong liquor, they should do so moderately," he added. "Liquor and bullets do not mix successfully."

## Zick is Named—

(Continued From Page 1)

J. Emerson of Oregon, whose death created the judicial vacancy in the 15th district.

A. M. Smith of Stockton served as secretary of the convention, which was recessed six times to allow county delegations to hold caucuses.

Former Judge Franklin J. Stransky of Savanna opened the nominations by placing Stewart's name before the convention. Attorney Harry Tear of Galena followed with the nomination of Heer, and E. D. Landers of Oregon asked the convention to select Zick as its candidate. The Stephenson and Lee county delegations did not offer nominations.

On the first ballot Heer and Zick each polled 31 and a fraction votes, and Stewart received 14 and a fraction. An immediate recess was taken so the delegations could hold caucuses.

The Ogle, Jo Daviess and Carroll county groups voted solidly for their respective candidates on the first ballot, while Stephenson gave 13 and a fraction to Heer, six and a fraction to Zick, while Lee gave six to Heer, six to Zick and five and a fraction to Stewart.

When the second vote was taken Lee county changed its lineup, giving Heer and Stewart five each and Zick seven and 353-500th. The fifth ballot found Lee county increasing its vote for Zick to nine and 353-500th, with Heer and Stewart receiving four each.

Zick increased his lead on the fourteenth ballot, when Lee county dropped Heer and gave 12 votes to Zick and five and 353-500th to Stewart.

## How Delegates Voted

When Carroll county changed its stand on the seventeenth and final ballot, the nomination went to the Ogle county entry. Carroll delegates cast their votes as follows: Heer, three; Zick, three; and Stewart, three and 23-500th.

Other counties voted as follows on the final roll call:

Jo Daviess—Heer, 11 and 319-500th.

Lee—Zick, 12; Stewart, 5 and 353-55th.

Ogle—Zick, 19 and 31-500th.

Stephenson—Heer, 13 and 278-500th; Zick, 6 and 264-500th.

In his acceptance address, Judge Zick thanked the delegates for the nomination and said he was ready to wage an intensive campaign to bring about a Republican victory Dec. 7. Heer and Stewart congratulated the victor, and thanked the delegates who had supported them.

## Native of Polo

A native of Polo, where he was born 42 years ago, Judge Zick was elected to finish out the term of the late County Judge Frank Reed of Oregon in 1925. He has been re-elected three times since, the last time in 1934.

He was graduated from the Northwestern university law school in 1916 and has practiced law in Ogle county since that time. At the time of his election to the County court at Oregon, he was one of the youngest county judges in the nation.

Judge Zick is the son of the late Fred Zick of Polo, well-known Ogle county lawyer. His mother still resides in Polo.

He has been a life-long Republican and is well-known throughout the entire judicial circuit. In recent months, he has been presiding in the Lee and Stephenson county courts following the death of county judges here and in Freeport.

Judge Zick is married and the father of one son.

Among those mentioned as possible Democratic candidates are Louis J. Reinhold, of Freeport, former state's attorney of Stephenson county; Attorney A. H. Hanneken, of Dixon, court reporter for Judge Albert H. Manus of Freeport; Attorney Martin Eakle of Forrester and Attorney Louis Nack of Galena.

## USEFULNESS IMPAIRED BEFORE BEGUN

During the long time the republicans were in con-  
trol of the federal government and in many of the states,  
it occurred occasionally that some public official's use-  
fulness would be so impaired that he had to be dropped  
from his position. Often the thing that brought about  
the impairment would be trivial, sometimes very trivial,  
yet no matter how valuable the public servant may have  
been before, he had to be dropped because either ridi-  
cule or a lack of confidence had made continuance in of-  
fice a liability to the administration. Careers of some  
very able officials have been ruined because the mud  
throwing got too thick.

Indications are that Justice Black had outlived his  
usefulness in the Supreme Court of the United States be-  
fore it began.

It is possible for a member of the court to continue  
through a generation without having to decide an im-  
portant case involving freedom of religion or freedom  
of the press or freedom of assembly. But when a case  
of that kind comes, it determines issues most vital to  
the foundation of our government.

When such cases come Justice Black is not in po-  
sition to dispose of them fairly and in a manner in which  
the public may give him credit for his opinions while  
differing with them. An essential of a court is that it  
be given credit for honesty in findings, even when we  
are in disagreement, and we have had courts that have  
stood that way in public opinion. That is why our courts  
have been strong in public esteem, and that bulwark  
even so popular a president as Mr. Roosevelt has not yet  
been able to break down.

What is the position of Justice Black?

First, the tracks he made in the sand a decade ago  
showed a man had passed that way who was prejudiced  
in the matter of religion and race and was identified  
with a movement that was active in taking into its own  
hands the enforcement of its secret decrees under cover  
of night and under cover of a hood.

Second, he acknowledges all that, but says he now  
has divested himself of it.

Third, in order to divest himself of it in the public  
mind, he causes it to be announced that at his beck and  
call he has fortified himself by choosing a Jew and a  
Catholic, and by the assignment to him of a negro Cath-  
olic. That is the method of a ward politician, above  
which the justice should have risen.

Fourth, comes the matter of dispensing even-handed  
justice. It is not justice if he is controlled by the forces  
that dominated his mind when he made tracks in the  
sand as the Klansman ten years ago. It is not justice if  
he rushes over to the opposite side in order to appear to  
be fair, as he apparently has done in making his ap-  
pointments in his new office.

Give Justice Black credit for being intent upon put-  
ting behind him his record for unlawfully obtaining  
private telegrams and being condemned therefor by the  
supreme court for unlawful conduct; for being intent  
upon putting behind him his record of prejudice in the  
matter of race and religion, and for being intent upon  
unbiased administration of justice in accordance with  
the traditions of the highest court in the land, the bul-  
wark of constitutional government. Nevertheless his  
usefulness is impaired before it is begun. He will have  
to live through a generation before he will be relieved  
of the suspicion of bigotry if he leans one way and of do-  
ing a political trick to square himself if he goes the other  
way.

How can a man dispense free-handed justice after  
the manner we expect from the supreme court when his  
career so is blasted in the beginning?

## HAND SIGNALS

One of the elements of operating an automobile to  
which the public seems generally indifferent is the hand  
signal which law requires us to make when about to  
change direction or to stop.

The signals, designated by law and required under  
penalty of arrest and fine, are as follows:

To indicate a stop or slowing of speed: Extend left  
arm from window, pointing downward.

To indicate a right turn: Extend arm from window,  
pointing upward; or extend arm making sweeping mo-  
tion from rear to front.

To indicate a left turn: Extend arm horizontally.  
Obviously it is not enough to make the signal after  
one has already started the maneuver. It should be  
made soon enough to give drivers behind and ahead  
time to make allowance for what one expects to do.

Familiarity with the signals is essential. Too many  
drivers, when they bother to make a signal at all, mere-  
ly hang the left arm out of the window and permit it  
to flap in the breeze. Others, for all occasions, signal  
a left turn. Perhaps these ladies and gentlemen who  
make false signals are only slightly less menacing to  
traffic than those who make no signals at all.

And those who make no signals at all are in the  
majority hereabouts. It is a fair guess that if all those  
who turn or stop without making signals were to be put

in jail, business would be suspended; churches would  
close and newspapers which operate trucks would be  
hampered in their deliveries.

There is some reason for this laxity of signalling in  
this climate. During winter the operation of signalling  
requires one to begin rolling down a window a block  
or so from the start of a turn, and the business of hold-  
ing a hand and arm out in the sleet, rain or snow, or  
in the frigid blasts of a day when the temperature is  
near or below zero, is uninviting. The motorist gets  
the habit of ignoring the signalling law, and when sum-  
mer comes around he remembers that he got along all  
winter without making signals, so why start it now?

But the law is the law, and those who stop their cars  
or change direction without signalling as required by  
statute are subject to arrest and fine.

## POLO NEWS

By Kathryn Keagy  
Polo—Mrs. Paul Strite was pleas-  
antly surprised Wednesday evening,  
at the home of Mrs. Wava Pat-  
terson, when about twenty friends as-  
sembled to help her celebrate her  
birthday. She and her family had  
been invited to Mrs. Patterson's to  
spend the evening, but were not  
aware that there were to be other  
guests. The evening was spent in  
playing progressive "42" and euchre.  
Mrs. Strite received a number of  
remembrances. At the close of the  
evening a two course lunch was  
served. Misses Kathryn Krawmer  
of Lima, O., and Ruth Murray of  
Covington, O., were out of town  
guests.

Supt. and Mrs. C. H. Miller and  
family of Saginaw, Mich., arrived  
and will be the guests of relatives  
until Sunday. Mrs. Miller is a sis-  
ter of Mrs. C. E. Bamforth, Ray-  
ver, Calif., is visiting his brother  
Frank and family.

The fire truck was called to a  
field in the west end of Polo early  
Wednesday evening to extinguish a  
fire in the corn field. Shocks of  
corn caught fire, which in turn  
caught a roof to a nearby barn. The  
blaze was extinguished before any  
great amount of damage was done.  
The land was being worked by D.  
J. Holmes. The loss is estimated at  
\$50.

Armistice Day, with all the memo-  
ries of our comrades, dead and  
living, with whom we marched  
and fought shoulder to shoulder is  
upon us again. The wars are over

did not end with the signing of the  
Armistice.

It now devolves upon us, we who  
bore arms in the World War, to  
enlist once more in this battling  
group, the American Legion, and  
fight on for the principles of De-  
mocracy, and for the task of build-  
ing better citizens, and the welfare  
of the community, state and na-

Our work with the boys in our

## LET'S EXPLORE YOUR MIND

A fascinating Albert Edward Wiggam, S.B.  
pastime with THE MARKS OF A CLEAR MIND  
Author of

"The keenest anguish known to human nature is the pain of a new idea." (Bagehot). We hope this  
column brings you pain.

Answer to Question No. 1 ....

1. Bosh! If there is anything that  
knocks both the horse and creative  
sense out of a man more than rom-  
ance and being in love I don't know  
what it is. No man can go around  
in a haze of romantic somnambul-  
ism about some woman without  
slowing down his output, and the  
same is true of women. Every time  
the phone rings or he gets a letter  
without as many X's at the bottom  
as he expects—he is all het up to  
know "what's happened now." Even  
if a man is creating a feminine  
heroine, the more he keeps his mind  
on his heroine objectively and the  
less he is concerned about himself  
subjectively, the greater will be his  
creation. "The quiet mind" and  
heart are the necessary conditions  
even of high intellectual excite-  
ment.

Answer to Question No. 2  
2. This extremely important mat-  
ter has just been studied by Dr.  
Andrew J. Miller, of the Pittsburgh  
public schools. He compared a large

Inventory Your Personality

Knowledge of your Emotional  
and Personality traits is of great value  
to you. Dr. Wiggam has persuaded  
one of America's greatest Universi-  
ties to permit the offer of the Per-  
sonality Schedule used by it in de-  
termining personality strengths and  
weaknesses of college students. This  
Personality Schedule was prepared  
by one of America's leading psychol-  
ogists. It contains 220 scientifically  
tested questions designed to measure  
your Personality. A method of self-  
grading is provided. Knowing your  
strengths and weaknesses equips you  
for self-improvement. This Per-  
sonality Schedule is yours upon request  
accompanied by stamped (3c) self-  
addressed return envelope, together  
with 10c in coin to cover actual costs.

group of brilliant and average col-  
lege students—both men and wo-  
men—and took the three following  
items as good tests of likeability  
(1) Election to fraternities, musical  
clubs, debating teams, etc.; (2)  
the range and variety of the clubs,  
etc.; and (3) election as officers or  
leaders in these organizations.  
Twice as many of the brilliant stu-  
dents were elected as fraternity or

sorority officers, five times as many  
as class officers, three times as  
many in dramatic casts, twice as  
many as editors of school papers,  
etc.

Answer to Question No. 3

3. According to Edmund Pearson,  
in a leading article, it leads many  
people to take strange, fantastic  
methods in murdering, believing  
they are following the most "scien-  
tific" methods of the best fiction  
murders. They are usually so  
bungling that they are caught be-  
fore the victim's blood is cold.  
This was true of the "perfect mur-  
der" of Florence Small, whose hus-  
band shot her, beat her with a  
poker and strangled her and went  
to Boston, leaving an alarm clock  
to touch off a fire and burn her  
and the house during his absence.  
But Mrs. Small's body fell through  
the floor into a pool of water in the  
cellar and escaped being burned!  
So Small was arrested and convict-  
ed.

## A Steel Snake Crawls Into China

Like a wriggling serpent of steel this file of small Japanese tanks  
wriggles along a poor and narrow road to penetrate an ancient  
Chinese village. Note how one man of each tank's crew, not antici-  
pating immediate action, sits atop the open batches of the tanks  
as they wind along the road. The thatched roofs form an interest-  
ing contrast—old world and new war.

In 1752, when the Gregorian  
calendar was adopted in England,  
people went to bed on Sept. 2 and  
awoke on Sept. 14, the "longest

## Brethren Young People Enjoyed Warm Camp Fire

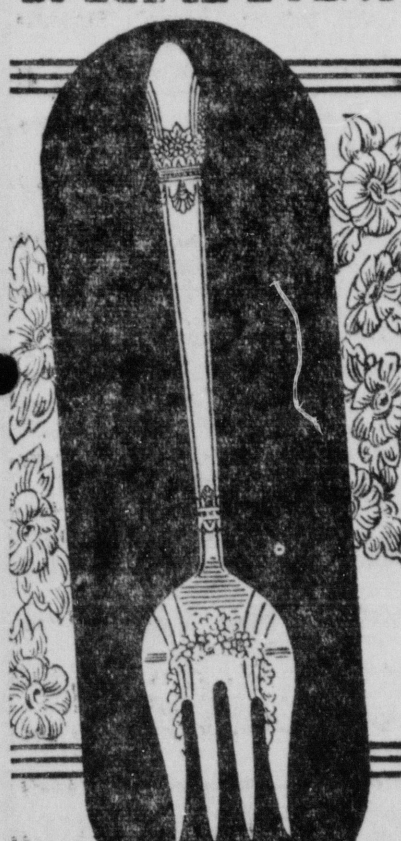

For those who enjoy adventure, romance and thrilling experiences would of had their hearts content last night at the camp fire of the young people of the Brethren church. Between twenty-five and thirty were present and the evening was cool enough to put pep in everyone at an appreciation of a good camp fire.

The jollification took place at the home of Wilmer Gerdes, a member of the class, and was host of the happy group last night. Everyone in their cars, Wilmer took the lead in finding the selected place of the camp fire and he led the way through pasture fields, over hills and valleys, through timber belts, through the Royal Gorge, making hair-pin curves, up and down, mostly down, until he finally halted in a valley surrounded by hills where all preparation had been made for a grand camp fire. The fire was soon sparking rays of heat and light, heavenward which was appreciated very much on a chilly night. Singing and various games in which everyone participated was a happy experience for merry hearts. The members of the group regretted that only about half their group could be present but all will lend a helping hand in the coming revival meeting which will begin next Sunday, when Paul Thompson and his wife, who were members of this young people's group a couple of years ago, will be the evangelist. The young people of the church are planning a booster meeting for the revival campaign Sunday night at 6:45 to which all young people are invited, as the young people will have a prominent part in the revival.

The Crusaders Sunday school class of the Brethren church met in the basement of the church last night with an attendance of 25. Each family brought something good to eat, and soon after arrival the happy group was enjoying a delicious meal together. The class has had many happy occasions together in this way and last night was no exception to the rule. The fellowship was conducive to transmitting warmth in the hearts of each one present and a very pleasant evening was enjoyed together.

Mrs. C. A. Bryan is teacher of the class and the class has a bright future under her leadership. The class has the evangelistic spirit and will be loyal helpers in the revival campaign which will begin Sunday.

### THE RIDDLE OF INTELLIGENCE

By Iago Galdston, M. D.  
As language is often a true impediment to understanding, many scientists feel that no idea is adequately refined until it is expressed mathematically.

Mathematical symbols have fewer optional meanings than do words. And yet, all symbols are subject to one serious misuse. They are very likely to be misunderstood as standing for a concrete reality. They are frequently accepted as the reality without much critical thought being given to the nature or composition of that reality.

Ask any one using the term "intelligence" to define it, to give a detailed explanation of what he means by intelligence. Chances are he will soon be foundering in a sea of words. But there is little to wonder at in that. Those who have devoted years of study to this subject are little able to define intelligence more adequately.

But what of intelligence tests and quotients? Here, indeed, we have something expressed mathematically. Isn't there a concrete, well defined reality behind it all? There no doubt is. But what it is, we can only guess at and approximate, but hardly define.

The average man has a good working definition of intelligence, however:

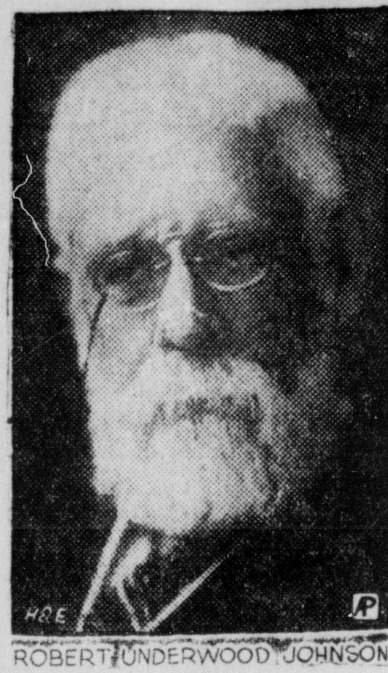

"That's what a man shows when he knows enough to come in out of the rain."

In this way he defines intelligence in terms of competence to appreciate what is required in a given situation and to act accordingly. Many an individual with a relatively low I. Q. is by that test of experience shown to be more intelligent than his brother with a higher I. Q. However, this is likely to be the case only as long as the situations confronting him are simple, or within his limited capacity to appreciate and to act accordingly.

There is still another point to bear in mind: The lower I. Q. individual is more likely to stay within his own pasture and not wander off into strange fields. The higher I. Q. individual is likely to seek, if not adventure, at least satisfaction for his more active curiosity.

But all this still does not define intelligence. It should, however, serve to illustrate the complex nature of that which we term intelligence and to discourage the uncritical use of the word.

## "Kind Night"

ROBERT UNDERWOOD JOHNSON

New York, Oct. 15.—(AP)—Robert Underwood Johnson has found the "kind night" when, as he wrote on his eightieth birthday, Mother Nature crooned:

"Come, sleepy boy, companion of my ways  
"When joy was yours, with me shall be your rest."

The whimsical genial man, oft acclaimed as the unofficial poet laureate of the United States, died yesterday after a period of ill health that stretched back to the winter of 1935. He was 84 and had enjoyed a literary career that dated from post-Civil War days. During his many-sided life he had served as a fellow telegraph operator with Thomas Edison, a clerk in a book agency, a magazine editor, the literary tutor who guided Ulysses S. Grant in writing his "Personal Memoirs," and ambassador to Italy (1920-21). But he always vested his chief allegiance in the world of letters.

At the time of his death he was director of the hall of fame at New York University. During his long association with Century Magazine, which dated from 1873 and included the editorship from 1909 to 1913, he edited the series of articles later published in four volumes and known to historians and lay readers alike as "battles and leaders of the Civil war." He won international recognition and decorations from a half dozen foreign governments for his work in promoting the international copyright enacted in 1891.

Two dependents of the war of 1812 veterans still were drawing pensions on June 30. Mrs. Carolina King of Sheektowaga, N. Y., drew \$600 during the year, and Mrs. Esther A. H. Morgan of Independence, Ore., received \$240.

Spanish-American War veterans ranked second to those of the World War when 175,361 veterans drew \$96,618,465. Dependent's pensions total \$18,305,669.

## Novelist Declares Nazi Propagandist Has Ohio Offices

Boston, Oct. 15—(AP)—John Spivak, novelist investigator and former foreign correspondent, testified before a legislative committee that Edward H. Hunter, whom he described as New England agent for distribution of Nazi propaganda, was directly tied up with an office in Columbus, O.

While the hearing was still in session Hunter asked the committee to be given an opportunity to enter a denial. No immediate action was taken on his request.

Spivak swore that Hunter was connected with J. A. Colescott, whom he described as grand dragon of the "realm of the Ohio, Illinois and Michigan Ku Klux Klan." He said Colescott's headquarters were in Columbus "from where he sent Ku Klux Klan propaganda throughout the country."

## "Brother Rat," Selwyn Theatre, Chicago

"Brother Rat," the newest and most hilarious laugh hit to come this way in years, is the current attraction at the Selwyn Theatre, Chicago.

Produced by George Abbott, making it three in a row in the way of laugh successes, and authorized by John Monks, Jr., and Fred F. Finckelhoff, (just out of military college), "Brother Rat" is by way of being a sensation.

The title refers not to gangsters or underworld characters, but is rather a term of affectionate regard used by the upper classmen who automatically become "brother rats" as they progress. Among famous men today there are many "brother rats"; to name a few, Admiral Byrd, Jack Holt and Colonel Frederick Green, Chief Engineer of New York State, who are graduates of Virginia Military Institute, (the locale of "Brother Rat") all are "brother rats" to the classmates.

The exciting story deals with a student escapades in and outside campus bounds, with romance cleverly interwoven. There is not a dull moment during the two hours and a half's playing time, as attested by huge audiences that have rocked the different theatres with howls of laughter nightly. "Brother Rat" has been acclaimed as the brightest, freshest and funniest comedy in years.

Included in the large, young and talented cast are Florence Sundstrom, Marie Brown, Katherine Murphy, Lora Rogers, Edwin L. Phillips, Tom Ewell, Paul Ballantyne, Owen Martin, Roger Hewlett, Frank Camp, William Tracy and others.

By EDDIE BRIETZ  
New York, Oct. 15.—(AP)—True story: Down at Burlington, N. C., the Tower and McEwen hosiery mill teams collided in a seven-game series to decide the championship of an industrial league. . . . After nine games, the boys voted to "call the whole thing off," to get to the World Series on time. . . . McEwen had won three games at the finish and Tower two. . . . The other four ended in ties, help us. . . . (Manager of Tower was Dave Barbee, former big leaguer. . . . He hit safely on 10 of his 14 trips to the plate. . . . Five of the 10 blows were homers. . . . Sports writers down there swear the series was on the level.

Paddy Driscoll of Marquette is one coach who can't let "George do it" this year. . . . He hasn't a single guy named George on his squad. . . . There are plenty of Bobs, Bills, Johns, Joes and Franks—and even on Reginald (goodness George)—but no George.

On his rounds the other night, your correspondent spotted Helene Garrell, former Pittsburgh basketball star, head-hoisting in the Georgian room of the Hotel Pica-dilly. . . . (She's as easy to look at as ever). . . . As compact a sectional sports conference book as ever reached this desk is the Missouri Valley Conference handbook, edited by Leighton Housh. . . . It contains everything from cross country to the Constitution. . . . Here's an odd twin story: Jack and Dick Gormley, playing end and center for Louisiana State, look so little alike they don't fool the opposition. . . . Now, if that ain't one for the book, sue us.

## Rain Temporarily Halts Quest For New Speed Record

Bonneville Salt Flats, Utah, Oct. 15.—(AP)—Capt. George E. T. Eyston, wrecker of automobile speed marks, temporarily put aside preparations for a long-distance record today to concentrate on the measured mile.

The Briton proposes to rocket his "Thunderbolt" over the mile faster than man ever has traveled on land.

"That is to say," explained the angular Englishman, "I hope to break the record of 301 miles an hour that my countryman, Sir Malcolm Campbell, established on this same race course."

Rain, laying a two-inch water carpet over the salt, forced Eyston to halt after 15½ hours yesterday in an attempt in the "Speed of the Winds," less powerful of his two racing machines, to establish distance marks up to 24 hours.

## SPECIAL SESSION NECESSITATED BY FARM PROBLEMS

Washington, Oct. 15.—(AP)—When Congress meets next month, it will be the third time in less than nine years that it has been called into extra session to legislate on the "farm problem."

President Hoover, redeeming a campaign pledge, called an extra session April 15, 1929, to consider farm relief measures. Creation of the federal farm board resulted. It lasted only a few years.

President Roosevelt, on March 9, 1933, called Congress together to consider much emergency legislation, including an attempt to increase the purchasing power of farmers. The agricultural adjustment act, later invalidated by the Supreme Court, was enacted.

At its session next month, Congress will tackle again the problem of putting agriculture on a permanently profitable basis.

The principal approach suggested to reach that goal is the "ever-normal granary" fostered by Secretary Wallace. The granary idea, similar to that of the Biblical Joseph when he was Pharaoh's adviser, proposes the storage of surplus crops for use in years of slim harvests.

President Roosevelt has spoken similarly of an "all weather" system to provide stable conditions.

Most of the debate is expected to center on the methods of obtaining individual compliance with crop control.

## PICKING GRID WINNERS THIS WEEK IS HARD

## Dope Expert Gives Faint-Hearted Selections

By HERBERT W. BARKER  
New York, Oct. 15.—(AP)—Roaring with anticipatory pain, this corner plows hear-on into a baffling slate of major football games and then scurries hurriedly for the nearest gopher hole.

Fordham-Pitt: We'll take Pitt, but give due warning that if this ends in their third successive scoreless tie, the scream that will arise from this corner will be heard all the way to the banks of the Monongahela.

Tennessee-Alabama: For no discernible reason, Alabama. Northwestern-Purdue: Maybe this is the week that Purdue scoring punch will be visible to the naked eye. In the absence of any definite proofs of its existence, however, we will take Northwestern.

Texas Christian-Texas A. and M.: As close as they come, but Aggies have done everything asked of them so far and rate the call. Southern California-Oregon: Strictly on the toss of a coin, Southern California.

## Cornell Gets No

Cornell-Syracuse: The Ithacans have lost George Peck, their finest runner, but still must be given the edge over the untested Syracuse. Yale-Army: Yale gets the nod. Navy-Harvard: From kick formation, Navy.

Columbia-Penn: Columbia. Carnegie Tech-Notre Dame-Notre Dame, but not by much. Colgate-Tulane: Tulane.

Holy Cross-Georgia: If Georgia has played a bad game in the north in recent years it must have been when this department was taking a 12-hour night-cap. The southern Bulldogs look good enough to stop Bill Osmanski and good enough to win the ball game.

Brown-Dartmouth: Dartmouth. Manhattan-Villanova: The coin says Villanova.

Chicago-Princeton: The Tigers get the call over inexperienced Chicago.

## WHEATON NEXT DEKALB NORMAL GRIDIRON FOE

## Profs Suffered First Homecoming Loss In Nine Years

Aroused by their first Homecoming defeat in nine years, reorganization is the theme this week at Northern Teachers. Coach Evans put his grid charges through a series of scrimmages as a means of developing new talent to fit into positions that showed to be none too strong in last Saturday's game. This week's foe for the Profs will be Wheaton, who has demonstrated that they are a much improved football club and one that can be feared by all opponents.

Most of the changes in the Prof machine will take place in the line. One set of forwards that have been shown considerable attention this week is Mark Dean at center; Eino Seppala and William Johnson at guard; Marinus Jorgensen and Wayne Quillen at end. Jorgensen, a fullback, has been moved into the line at end to help bolster the Prof offense. Apparently the starting backfield for the Wheaton game will show Merle Eby at quarterback; Orville Krahenbuhl and Lester Lundeen at halfback; with Jack Barber at fullback.

## Positions Open

Whether or not Coach Evans will rely on this group to participate in the opening kickoff next Saturday is not definitely known. However one thing is known for sure and that is that several positions are open because of lackadaisical play. "Spirit and hustle" is the theme for Saturday's game with Wheaton. Eby should straighten out the signal calling department and Stegman will remain at the tackle post.

The two major DeKalb injuries, Curtis Larsen and Paul Blair, are still on the crippled list and will not be used Saturday. They will however have an excellent chance to rest their particular ailments as the following week shows a break in the Prof schedule, the next game being booked for two weeks from Saturday against Wheaton.

## Classiest Pros Face Double Duty At Oklahoma City

Oklahoma City, Oct. 15.—(AP)—Sixteen of the nation's classiest pros, paced by Ralph Guldahl and Billie Burke, faced double duty today in the second and third rounds of Oklahoma City's first annual \$5,000 four-ball golf tournament.

Guldahl, national open champion from Chicago, and Burke, of White Sulphur Springs, W. Va., led the field of eight teams by a scant point, thanks to Billy's sensational 67.

One today is worth two tomorrow.  
—Benjamin Franklin.  
Write it on your heart that every day is the best day in the year.  
—Emerson.  
Today is your day and mine — the only day we have, the day in which we play our part. What our part may signify is the great whole we may not understand; but we are here to play it, and now is our time.  
—David Starr Jordan.

Trust no future, however pleasant! Let the dead Past buy its dead! Act, act in the living present! Heart within, and God overhead.  
—Longfellow.  
All the good that ever was, is now; and all good is present and available, here and now, in its fullness and perfection.

## SIMPLE HEALTH RULES FOR FALL, WINTER GIVEN

There is no reason why fall and winter should not be healthy seasons, yet many people dread the coming months. Following a few simple health rules will help in the prevention of those diseases which afflict careless person during the fall and winter, according to a statement from the Illinois Tuberculosis Association.

1. Go to your doctor for a physical examination. Beginning ailments may be detected while there is an opportunity for early correction.
2. Eat fats, starches and sugars for body heat, but do not neglect fresh and cooked vegetables and fruits for minerals, vitamins and roughage.
3. Do not "go stale" through lack of exercise. Physical activity for the normal person is just as important in winter as in summer.
4. Get some sunshine, not through glass but directly.
5. Avoid persons with colds. Coughers and sneezers spread disease germs. If you catch cold, do not neglect it.
6. Sleep at least eight hours out of every 24. Drink plenty of water.
7. Be moderate. Disease germs find hospitality in the weary, fatigued body.

## Tinkham Proposes Impeaching F. D. R. Secretary Hull

Washington, Oct. 15—AP—Representative Tinkham (R-Mass.) has suggested in a cablegram from Geneva that Congress consider the impeachment of President Roosevelt and Secretary Hull for not invoking the neutrality law as it respects the Sino-Japanese conflict.

Tinkham cabled Hull, in a message made public here: "The President and you have torn to shreds this (neutrality) law and wholly nullified the will of Congress in reference to the war in China. Congress upon reassembling should seriously consider the impeachment of the President and yourself for high crime and misdemeanor."

## OUT OF THE NIGHT

BY MARION WHITE

Copyright, 1937, NEA Service, Inc.

CILLY leaped helplessly against  
the wall while Dolan pro-  
ceeded to give orders over the  
telephone to trace Jim's call.

Jim had phoned from the Penn-  
sylvania Hotel. The operator ver-  
ified that. He could get out and  
disappear into the subway in 30  
seconds. She felt a subtle pleas-  
ure at having outwitted Dolan.

He was so sure of himself, so  
positive in his theory. What did  
it matter to him that he was rail-  
roading an innocent man to jail;

to the . . . to the electric chair!  
For the first time, Cilly caught  
the full significance of what Jim  
was facing. She held her breath  
as a new terror seized her.

Dolan was arresting her. There  
would be nobody to carry on for  
Jim . . . nobody to watch the  
Hunter man, or Harvey Ames . . .  
nobody to check on Carruthers  
who also came from Utah. Dolan  
would forget all that.

Suddenly she faced Dolan, her  
eyes burning with indignation and  
terror and despair.

"Why are you so determined to  
accuse Jim? What about Harvey  
Ames? He had every opportunity  
and just as good a motive. What  
about Hunter? There are a dozen  
angles that you refuse to consider."

Dolan frowned in annoyance.

"What time was this?"

"Exactly midnight. Remember,  
Mary, you remarked on it?"

"Yes," Mrs. Perry affirmed. "The  
steep clock was just striking  
midnight. I teased Mr. Kerrigan  
about being in such a hurry to  
leave Priscilla, and he explained  
that he had to make a hurried  
trip out west. He didn't want to  
wait for trains, and there was a  
friend of his—a private pilot—who  
was leaving Floyd Bennett  
Field at 12:30 for Chicago. Mr.  
Kerrigan wanted to catch him, but  
of course because he was in such  
a hurry he couldn't get a taxi. So  
we drove him down to the flying  
field."

"You drove him to Floyd Ben-  
nett Field Sunday night?" Dolan  
repeated incredulously. He saw  
his carefully prepared case crum-  
bling before him.

# PERFECT TEAMS EXTREMELY RARE

Only Four Football  
Teams Since 1912 Of  
That Rating

Atlanta, Oct. 15.—(AP)—What is your football team's chance of a "perfect" record this season?

It is about 838 to 1 you will be disappointed if you expect it to finish undefeated, united and unscored upon. These odds were figured from a survey of records of 134 leading colleges for the last 25 years—the period of modern football.

There have been only four full-fledged "perfect" eleven's since full development of the forward pass in 1912. Only Texas A. & M. (twice), Colgate and DePauw marched through a full schedule without a blemish in the 25-year span.

Dana X. Bible, now at Texas, is the only coach to produce two "perfect" teams among the 134 colleges. His Texas A. & M. Aggies shut out 18 opponents while rolling up 545 points in 1917 and 1919.

Andy Kerr's Colgate Red Raiders of 1932 ripped through nine foes without yielding a point while totaling 264 themselves. Little DePauw University of Indiana blanketed seven teams of slower company in 1933.

If you prefer to figure from 1920 through 1936, the chances for a clean record are even dimmer. With only two "perfect" eleven's in that 17-year period, the odds are about 1139 to 1. The old-timers had the best hope, one out of about 240, before football began taking definite trends toward the modern game in 1912.

Probably the most famous of the unscored-on powerhouses was Fielding H. Yost's point-a-minute machine at Michigan in 1901. It piled up 550 points in 14 shutout victories.

## MT. MORRIS

By Pauline Yoe  
Mt. Morris—This afternoon at 4 o'clock will occur the wedding of Miss Marian Corbett, daughter of Mr. and Mrs. Joe Corbett of Polo and Gladys Miller, son of Mr. and Mrs. William Miller of North English, Ia.

They are leaving this morning for "The Little Brown Church" where Rev. William Kent will read the ceremony. The couple will be attended by Miss Margaret Beck of Polo and Ralph Mendenhall.

## Brain Twizzlers

By  
PROF. J. D. FLINT

Cactus Charlie and Desert-Rat Donovan each had a horse to sell and Pop Perkins wanted to buy a horse so they were trying to get together on a deal. Charlie asked a certain price for his horse and Donovan asked 50 per cent more for his. Then Charlie cut his price 20 per cent and Donovan cut his 30 per cent. At those bargain prices Perkins took both horses, paying \$148 for them. What was the price paid for each horse and each man's asking price?

Answer to Yesterday's Twizzler  
You, the hunter walks around the squirrel because the hunter travels in a circle and therefore, sensibly, goes around anything within the circle.  
(Copyright, John F. Dille Co.)

mourn the passing of one, who, by her sunny disposition and loving, thoughtful kindness endeared herself to all who knew her. Mrs. Covert was a member of the Rebekah lodge and although in later years she was unable to attend services, she always kept in touch with the lodge and church through her loving friends and will be greatly missed by all.

At the golden hour of sunset On this bright October day, She closed her eyes in slumber And gently passed away.

Sleep on, dear one, await us there While we our vigil keep, And await the summons that must come To deep and dreamless sleep.

### CONVENIENT TOOLS

Salt Lake City, Oct. 15.—(AP)—Blacksmith Phillip Schonert's tools are indispensable to the thieves who have raided druggist W. H. Woodring's safe three times since April.

So when Woodring reported his vault had been rifled again, police anticipated Schonert's report that a sledgehammer and cold chisel had been stolen from his shop. Each time, the tools were used to knock the combination off the druggist's safe.

Five million meals, one for every five of estimated attendance, are expected to be served on Treasure Island during San Francisco's 1939 Golden Gate International Exposition.

Hudson Maxim, inventor of Maximite and high explosives, was born on Feb. 3, 1853.

## Auto Traffic Toll 20 Percent Higher

Washington, Oct. 15.—(AP)—The nation's auto traffic toll, despite "spotty improvement" in state and cities which have conducted vigorous safety campaigns, is running about 20 per cent ahead of last year.

This estimate was made by the American automobile association. It was based partly on fatality reports of the census bureau which showed 6,905 fatalities in 125 cities above 50,000 population during the first 39 weeks this year, as compared with 6,234 in the same period of 1936. In the first 39 weeks of 1935 fatalities totaled 6,769 in the 125 cities.

Burton W. Marsh, director of safety and traffic engineering of the A. A. A. noted that only five states—Florida, Illinois, Louisiana, Mississippi and South Dakota—now have no drivers' license laws.

The airport terminal building on Treasure Island, site of the 1939 Golden Gate International Exposition, will provide ticket offices, weather bureau, waiting rooms, customs office and hotel accommodations for the new San Francisco Airport.
